

Pole Docks

Designer Series

Designer Series

Designer Series Pole Docks, the cornerstone of On the Water Designs, are hand crafted by experienced welders using the highest quality Canadian materials at our factory in Muskoka. Each section utilizes marine-grade aluminum framing and stainless steel fasteners to ensure a completely rust free design. Pole docks are ideal for shallow water and clients looking for security and stability in a dock.

Do you have a growing family? Our docks can be reconfigured and expanded to be as enjoyable in the future as it is in the first year.

Custom sizes and flexible design features allow for additional flexibility where needed. All frames* include decking support stringers every 16" allowing for almost any choice of decking both now and in the future. Our exclusive deck panel clips clamp decking securely to the frame giving peace of mind in rough conditions.

*4' wide frames span 24" unless sold with PVC"

All Pole Docks Include:

- ✓ Frame & Decking (If Purchased)
- ✓ Foot Pads & Pole Caps
- ✓ Connecting Fasteners
- ✓ 10 Year Welded Frame Warranty

Standard Leg Design

- ✓ Legs raised above decking can be used to tie up your boat
- ✓ Great for fluctuating water levels allowing you to raise & lower your dock the full height of the dock legs
- ✓ Can act as a support handle for people needing extra assistance getting in & out of boats

Why Choose Hidden Leg Upgrade:

- Poles hidden below decking is a cleaner look and more aesthetically pleasing
- → Hidden leg eliminates unwanted hazzard of dock legs protruding through decking
- ✓ Dock legs remain hidden under decking allowing more useable surface area
- ✓ Choose when dock height will not need to be adjusted more than 8"
